

RUIRU – JUJA WATER & SEWERAGE COMPANY LTD

WATER DISTRIBUTION PROGRAM 2021

Ruiru and Juja areas are notably some of the fastest growing towns in Kenya and water demand has exceeded our current water production capacity, necessitating us to apply equitable water distribution through rationing.

We request residents and water customers to conserve and apply below water saving tips:

- Report any leakages and bursts outside your premises to hotline number **0800720820**, WhatsApp message to **0743944876** or RUJWASCO face book page
- Have adequate water storage like plastic tanks to store domestic water for use until the next supply cycle
- Do not use treated drinking water for irrigation of flower beds and vegetable gardens
- Do not leave taps dripping and repair any leaks within your premises.
